

DATA WAREHOUSE FOR MANAGEMENT AND ANALYSIS OF
TELECOMMUNICATION ACCESS SERVICE

ABSTRACT OF THE DISCLOSURE

[0117] This invention provides methods and systems for accessing, compiling, and processing rate and billing information from multiple billing systems, service regions, and/or regional rate guides to create an Access Customer Analysis Database (ACAD) of merged rate and billing records of data associated with a customer, a service agreement, a service usage, a service rate, service availability, a type of service, and/or a service region.
